PROFILE

M.Sc. student in Information and Communication Engineering at HAW Hamburg. I build small FastAPI services, put pytest in CI, build Docker images and deploy them with Kubernetes manifests on a local kind cluster. I also write Python/Bash automation for health checks and log triage. Working student in IT operations at Mondia until July 2026. I would like to stay in the DevOps team longer than one semester.

PROJECTS

custom-profile-service

May 2026 – September 2026

<https://github.com/mynulislam95/custom-profile-service>

- FastAPI service for product customisation records (draft → released). pytest + TestClient on /health, /ready, POST /profiles and /release.
- GitHub Actions: pytest with JUnit XML, then docker build. Jenkinsfile with the same Test and Package stages.
- Kubernetes Deployment, Service and ConfigMap; liveness on /health, readiness on /ready. Smoke check after a new image. kind cluster locally.

ops-duty-scripts

November 2025 – March 2026

<https://github.com/mynulislam95/ops-duty-scripts>

- Python CLIs for shift work: HTTP health poll (jsonl history), regex scan of ERROR/WARN in logs, duty_tasks.py that writes a handover file.
- Default is dry-run; --apply writes reports and an audit log. Incident runbook for when /health is down.

WORK EXPERIENCE

Working Student, IT Operations

June 2024 – July 2026

Mondia Group, Hamburg, Germany

- Incident handling: intake, reproduce, follow up with developers, close after retest.
- Handover notes for the next shift. Recurring faults I raised instead of only closing the ticket.

Working Student, Operations

November 2021 – September 2023

Motion E-Commerce GmbH, Hamburg, Germany

- Monitored failed production runs, tracked the cause, stayed on the case until it was closed.
- Excel control reports and short operating notes for the team.

EDUCATION

M.Sc. Information and Communication Engineering

April 2026 – Present

HAW Hamburg, Hamburg, Germany

B.Sc. Information Engineering

October 2023 – February 2026

HAW Hamburg, Hamburg, Germany

- Operating systems, computer networks, software engineering, IT systems, databases
- Thesis: Python data pipelines for day-ahead renewable energy forecasting

SKILLS AND LANGUAGES

CI/CD: Git, GitHub Actions, Jenkinsfile, Docker, Kubernetes (kind), JUnit XML

Code: Python, FastAPI, pytest, Bash, Linux

Ops: health endpoints, log triage, runbooks, incident follow-up

Languages: English fluent, German A2, Bengali native

Availability: 15–20 hours per week, at least two days, Hamburg (hybrid), can start now
